**APPLICATION:**
Set the brakes on the hospital bed.

1. Place TurnAssist glide sheet under the patient, placing the top of the sheet just slightly above the shoulders. If needed, place incontinence pad over sheet.
2. To offload the sacrum, place the wedges under the sheet. Roll the patient on their side and fold the glide sheet on top of the patient. Place the larger 18" wedge under upper torso and the smaller 14" wedge under lower torso.
3. Adjust the wedges to maximize support and ensure proper positioning. Check to see that the sacrum is completely offloaded.
4. Lay the sheet back over the wedges and allow the patient to lay back.

**WARNING:** This product is not designed for lifting or transferring patients.

**TO REPOSITION THE PATIENT:**

1. Slightly roll the patient on their side using the TurnAssist™ glide sheet to facilitate turning. Hold the wedge handles and remove the wedges.
2. Use the top handles on the glide sheet to slide the patient up and down the bed. Use the side handles to move the patient side to side or on their side for optimal wedge placement.
3. To ensure proper positioning of the wedges, use the side handles to move the patient on their side and then reapply the wedges as before. Check to see that the sacrum is completely offloaded.
4. Lay the sheet back over the wedges and allow the patient to lay back.

**CARE AND CLEANING:**
Follow your organization’s protocol and guidelines on use of disinfectants and for safe handling of soiled laundry.

**For Lighter Soils:**
Wipe down the sheet with pH balanced soap (e.g. mild dish soap or hand soap) and water solution and rinse with water or with your hospital approved disinfecant.

**For Heavier Soils:**
Machine wash sheets and wedge covers on the delicate cycle with warm water (Below 60 °C/140°F). Machine dry on low heat (below 50°C/120°F).

**For Foam Wedges:**
Remove covers from foam wedges. Clean foam wedges with disinfectant spray or wipes.

**WARNING:** Chlorine based cleaners, hot water washing, and high temperature drying may cause damage to the TurnAssist™
